# SIMPLY INDIVIDUAL – Schlüter®-LIPROTEC

LED light and ceramics – a combination that keeps gaining fans. Schlüter-LIPROTEC makes it easier than ever to create individual light concepts with ceramic or natural stone surfaces. With the Schlüter-LIPROTEC-EASY and Schlüter-LIPROTEC-PRO series, we offer systems that are tailored to the skills of the installers.

Whilst the EASY series is a plug-and-play system that only requires limited expertise in light installation, the PRO series is designed for professional tile installers who have experience with light installation and wiring. And finally, Schlüter-LIPROTEC-PLAN provides all information that professional (light) designers need to create and implement accent lighting with LIPROTEC.

## EASY

Individual light installation made easy – thanks to convenient plug systems and easy mounting, the plug-and-play series provides solutions for every situation, even for installers who are not experts.

- Convenient plug systems
- Easy mounting
- Ready for immediate use
- Large selection

## PLAN

In the PLAN section, planners, architects, light experts and installers find all technical information at a glance. With this expertise, there are no limits to what light installations can be created with Schlüter-LIPROTEC products.

## PRO

Lighting for professional installers – with the PRO series of Schlüter-LIPROTEC, turn any room into an oasis of light.

- Individual light installations
- Products with a multitude of combination options
- Limitless possibilities
- The series for professional installers

- Technical details
- Compact product overview
- Materials and surfaces
- Wide range of accessories

# AS VERSATILE AS THE LIGHT

Fascinate customers, turn visions of living spaces into reality, immersed in colour and the versatility of light. In the table on the next page of this price list, you can find the solutions for the various applications on this page, either as EASY (plug-and-play sets) or PRO (individually configurable).

For technical information and properties, refer to the PLAN section starting on page 72.

# EASY

Schlüter-LIPROTEC-LLP/-LLPM/-LLPE are LED modules consisting of a flexible, fully sheathed LED strip with homogenous light dispersion and a receptacle profile made of aluminium or stainless steel. The LED modules are available with either a fixed white-light colour temperature of 3000 K or 4900 K, or with a RGB+W colour range. The latter makes it possible to choose from more than 16 million hues and colour temperatures from 2500 K – 6500 K.

The robust carrier profile makes applications in areas with high exposure to environmental influences possible, from an installation height of 11 mm. It can be used on the wall and ceiling, as well as in the shower, for example. In less affected indoor areas, the LED modules can even be installed in the floor area. For use in protected outdoor areas and pool landscapes, we recommend using our Schlüter-LIPROTEC-LLPM LED modules with V4A stainless steel profiles.

The LED modules are available as plug-and-play versions in different lengths. Our LED strip can simply be shortened at the marked cutting points and sealed with the supplied end caps to maintain its IP degree of protection. The LED modules can be integrated into a system using cable connections and Y-switches, depending on the light characteristics. Power supply units and the Bluetooth control required for the RGB+W system are also available as plug-and-play versions, which makes installation easier. You can find additional accessories such as cable connections, distributors and hollow wall boxes with sealing function in the accessories section.

Available in  
April 2019

# Schlüter®-KERDI-BOARD-NLT

Schlüter-KERDI-BOARD-NLT are prefabricated niche sets made of KERDI-BOARD with plug-and-play LIPROTEC-LED technology. They are used to create illuminated niches and supporting surfaces for wall areas of all kinds. These niches can be integrated into the Schlüter-KERDI waterproofing system as a bonded waterproofing assembly.

The niches are available in different dimensions and hues. The rectangular niches are available with illumination either on the long or the narrow side. The LED module can either be positioned at the front edge, in the center or at the rear wall that is to be tiled. The scope of supply includes all components required for the installation, as well as the cable connection, power supply and sealing collar. We recommend using an on-site light switch to optimise operating convenience. A Bluetooth control for RGB+W lighting has to be ordered separately and can be found on page 16. (Product data sheet 12.1)

# PLUG & PLAY accessories

The plug-and-play system significantly simplifies combining the individual components. The schematic diagrams show a selection of combination options. Configure your individual light solution in the desired light hue. The respective system limits have to be taken into account.

## LED MODULES WW / NW

## LED MODULES RGB+W

## CONTROL

Schlüter-LIPROTEC-PEBR4 is a plug-and-play Bluetooth/radio receiver for controlling up to 6 m of RGB+W LED modules using the included radio remote control or via suitable Bluetooth on smartphones or tablets. The receiver is operated via Bluetooth by means of the Schlüter LED Colour Control app, which is downloadable for free for both Android and iOS devices. Up to two end devices can be simultaneously coupled with the receiver. In excess of 16 million colours and white tones with variable colour temperatures can be set with the RGB+W LED modules. A preselection of white and coloured hues is possible, these can be stored as favourites in the app. 42 different colour sequences are preprogrammed and can be played at variable speeds. The very compact dimensions of the Bluetooth receiver enable space-saving installation.

We recommend using an on-site light switch to optimise operating convenience.

For the technical data, refer to page 65.

## POWER SUPPLY UNITS

Power supply units convert the main voltage to the 24 V required by the LED strips. They are easy to install and available in different wattages from 30 to 100 W for LED strips up to 6/18 linear metres. They are equipped with a connection cable with Euro plug, as well as plug-and-play connectors for the Schlüter-LIPROTEC-EASY system.

### Schlüter®-LIPROTEC-PEKE

# PRO

With the plug-and-play sets from the EASY section, you can create a variety of individual light installations with ceramics and natural stone. But Schlüter-LIPROTEC offers a lot more. On the following pages, in the PRO section, you can combine profiles, LED strips, diffuser lenses, control equipment and accessories for individual projects. On page 4 and 5, you can find an orientation aid for identifying which profile is suitable for which application.

## Schlüter®-LIPROTEC-LL

You can create a wide variety of individual, linear accent lighting with Schlüter-LIPROTEC-LL. With its discreet, U-formed section, LIPROTEC-LL is suitable for many different installation situations in new buildings and with renovations.

For explanations of the symbols, refer to page 92/93.

## A real multi-talent!

Schlüter-LIPROTEC-LL is a high-quality, anodised aluminium carrier profile for creating accent lighting in wall coverings and ceilings. The illumination is provided by Schlüter-LIPROTEC-ES LED strips laid into the U-shaped profile, in combination with the corresponding diffuser lens. Various direct or indirect light effects are created according to the positioning of the profile.

(Product data sheet 15.5)

## Application areas:

- ✓ Linear light borders
- ✓ Illuminated borders in wall coverings
- ✓ Illuminated niche constructions

**Note:** Only suitable for vertical installation in the shower. For horizontal installation, we recommend our LED module LIPROTEC-LLPM on page 10.

- 1 Schlüter-LIPROTEC-LL profile
- 2 LED strip
- 3 Diffuser lens (direct illumination)

CONTROL

You can find the Bluetooth control on page 64.  
You can find the radio control on page 66.

## Schlüter®-LIPROTEC-LLE

Accent lighting for tile surfaces and much more: Schlüter-LIPROTEC-LLE is our first light profile that can not only be embedded in tiling, but also be used on any other suitable substrate, thanks to an intelligent clip system. LIPROTEC-LLE can be used both for internal and external corners details, as well as in shower areas (if mounted vertically) – a true multi-talent.

For explanations of the symbols, refer to page 92/93.

## Re-imagine rooms

Schlüter-LIPROTEC-LLE is a high-quality carrier profile made of anodised or white coated aluminium for mounting the Schlüter-LIPROTEC-ES LED strips. The profile is designed to create accent lighting in wall corners. It is suitable for use in internal and external corners in horizontal or vertical alignment. With the respective pre-fabricated parts, continuous installations around corners are also possible. The profile can either be simply attached to any suitable substrate with a clip system or is embedded in the tile adhesive. For lighting, the selected LIPROTEC-ES LED strip is adhered within the profile and covered with the corresponding diffuser lens.

(Product data sheet 15.7)

- 1 Schlüter-LIPROTEC-LLE profile
- 2 LED strip
- 3 Diffuser lens (direct illumination)

## Application areas:

- ✓ Linear light, vertical in the shower
- ✓ Linear light along the ceiling
- ✓ Accent lighting on the corner

**Note:** Only suitable for vertical installation in the shower. For horizontal installation, we recommend our LED module LIPROTEC-LLPM on page 10.

You can find the radio control on page 66.

## Schlüter®-LIPROTEC-WS

Providing accent lighting of components and wall panels with atmospheric LED light is the domain of the trusted Schlüter-LIPROTEC-WS profile. They can be combined with diffuser lenses for either indirect or direct light to create individual light experiences in combination with exquisite tiles or natural stone plates.

For explanations of the symbols, refer to page 92/93.

## Building with light

Schlüter-LIPROTEC-WS is a high-quality carrier profile of anodised aluminium for illuminating protruding wall panels with various Schlüter-LIPROTEC-ES LED strips integrated into the profile. Differing light effects are created in combination with two different diffuser lenses. The assembly can be used to create recessed direct or indirect lighting for on-wall structures. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

(Product data sheet 15.2)

## Schlüter®-LIPROTEC-WSK

Thought-through light design: An integrated cable duct, a support bracket for the tried-and-tested KERDI-BOARD (19 mm), diffuser lenses for direct and indirect illumination as desired – we have equipped the LIPROTEC-WSK products with features that make installation easier. And give the owner of the building an individual light experience that provides joy day for day.

For explanations of the symbols, refer to page 92/93.

## Accentuate!

Schlüter-LIPROTEC-WSK is a high-quality, anodised aluminium carrier profile for illuminating protruding wall panels with various Schlüter-LIPROTEC-ES LED strips laid into the profile. Differing light effects are created in combination with two different diffuser lenses. Recessed, indirect or narrow illumination for wall protrusions are created in this way. An integrated cable duct with milling grooves for cable installation and a support bracket for Schlüter-KERDI-BOARD (19 mm) aid the installation process.

## Schlüter®-LIPROTEC-PB

Schlüter-LIPROTEC-PB is our universal solution for illuminated step edges. From highlighting steps in a lobby to giving a reception desk a “floating” appearance, there are thousands of applications for the intelligent illumination technology of Schlüter-Systems. For step edges, combine LIPROTEC-PB with high-quality Schlüter-TREP profiles. For staircases, we recommend the new complete sets and combination sets on page 58.

For explanations of the symbols, refer to page 92/93.

## Step-by-step illumination

Schlüter-LIPROTEC-PB is a high-quality landing edge profile of anodised aluminium with a visible area of 25 mm. It is designed for mounting Schlüter-LIPROTEC-ES LED strips and can be used with Schlüter-TREP stair nosing profiles to create appealing lighting along the edges of platforms. Differing light effects are created in combination with two different diffuser lenses. Edges can either be illuminated indirectly or directly by adding a 3 mm light strip. Another application area of LIPROTEC-PB is the direct or indirect illumination of work surface front edges. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

(Product data sheet 15.4)

## Application areas:

- ✓ Platform step edges

- 1 Schlüter-LIPROTEC-PB profile
- 2 LED strip
- 3 Diffuser lens (indirect illumination)
- 4 Diffuser lens (direct illumination)

## Schlüter®-DESIGNBASE-QD

Timeless QUADEC design combined with modern LED technology: With Schlüter-DESIGNBASE-QD, illuminated skirtings and borders can be installed with ease. Create illuminated finishes for worktops or wall structures made of stud frame constructions or Schlüter-KERDI-BOARD in next to no time.

For explanations of the symbols, refer to page 92/93.

## Defined by light

Schlüter-DESIGNBASE-QD is a high quality-profile of anodised aluminium for versatile applications. It is designed for mounting various Schlüter-LIPROTEC-ES LED strips as a skirting or border profile in wall areas. A 39 mm diffuser lens is then used between the approx. 10 mm wide visible areas of the profile to create direct illumination. Other decorative materials such as tiles or wooden elements can also be inserted in the open space. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

(Product data sheet 16.1)

## Application areas:

- ✓ Skirting
- ✓ Illuminated borders in wall coverings

- 1 Profile AE
- 2 Profile AEEB
- 3 LED strip
- 4 Diffuser lens (direct illumination)

**Note:** Only suitable for vertical installation in the shower. For horizontal installation, we recommend our LED module LIPROTEC-LLPM on page 10.

You can find the radio control on page 66.

## Schlüter®-LIPROTEC-VB

Schlüter-LIPROTEC-VB not only is an elegant aluminium finishing profile for tiling – it also allows for integration of decorative accents in the tiling: for example by lighting the ceiling indirectly or as an illuminated guiding strip on the skirting tiles. Four different heights are available. Thanks to the installation height of just 3.5 mm, the Sideview-LED strips specifically designed for Schlüter-Systems are suitable for particularly detailed arrangements and lighting effects.

For explanations of the symbols, refer to page 92/93.

## Light from within the tile!

Schlüter-LIPROTEC-VB is a high-quality tile finishing profile for wall areas, with a visible area of 25 mm. It is designed for mounting Schlüter-LIPROTEC-ES LED strips and can be used to create varying light effects in combination with two different diffuser lenses. Indirect light can either radiate from the profile edge to the ceiling via adjoining materials or along the skirting. Additionally, a 3 mm light strip can create direct light. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

(Product data sheet 15.1)

### Application areas:

- ✓ Wall coverings:
- ✓ Skirting

- 1 Schlüter-LIPROTEC-VB profile
- 2 LED strip
- 3 Diffuser lens (indirect illumination)
- 4 Diffuser lens (direct illumination)

## Schlüter®-LIPROTEC-D

With Schlüter-LIPROTEC-D, you set design elements on the wall in scene. LIPROTEC-D offers solutions that are as individual and flexible as you when it comes to regardless of whether you want to highlight decorative elements, borders, pictures or mirrors, create a simple shadow joint, or set accents with indirect light – LIPROTEC-D offers solutions that are as individual and flexible as you are.

If it should be really simple: we've put together a frame set for you with dimensions of 118.5 x 93.5 cm, with clean mitre cuts and with power supply unit, LED strips and mounting material. You then only need a suitable mirror or decorative element.

For explanations of the symbols, refer to page 92/93.

## Properly framed!

Schlüter-LIPROTEC-D is a decorative receptacle profile for wall areas of anodised aluminium with a visible area of 6 mm. It allows for the insertion of various decorative materials such as glass or mirrors to adjoin ceramic tile coverings. LIPROTEC-D can be used to mount Schlüter-LIPROTEC-ES LED strips for creating indirect light effects around a decorative element. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

(Product data sheet 15.3)

## Application areas:

- ✓ Mirror
- ✓ Decorative elements made from a wide range of materials

- 1 Schlüter-LIPROTEC-D profile
- 2 LED strip

INDIRECT ILLUMINATION

## Wall panel sets (WSK)

The wall panel sets with RGB+W light makes it easy to make a big impression. Simply select between the wide (128.5 cm) and narrow (70 cm) wall panels and order the practical profile set with it. Our RGB+W technology provides you with unlimited design freedom: More than 16 million hues turn your rooms into colour-flooded leisure zones. White hues from 2500 K – 6500 K let your wall panels radiate the same light as your existing ceiling light. If desired, it can be controlled with a Bluetooth receiver. The matching Schlüter-Systems app can be downloaded for free from Google Play (Android™) or the Apple App Store (iOS).

You can find the appropriate Bluetooth control on page 64.

## Staircase sets (PB)

Schlüter-LIPROTEC-PB stair sets put light where it is needed: in the middle of the stair step. The PB 15 complete sets for 15 steps have 60 cm wide LED modules pre-mounted in the middle. With their diffuser lenses, they provide indirect illumination with a discreet line of light. The combinations of aluminium carrier profile and diffuser lens are 100/150 cm long and can be shortened individually as required. The LED modules have a 4500 K neutral white colour temperature and are cabled by means of a simple coupling system; a 500 cm connection cable and power supply are included in the set.

And if that isn't enough: the stair set can easily be expanded to 18 steps with only one supply line. To this end, use the Schlüter-LIPROTEC-PB 1 single-step sets.

Schlüter-LIPROTEC-PB 15

Schlüter-LIPROTEC-PB 1

## NEUTRAL WHITE

## Advantages:

- ✓ Pre-assembled ready for installation
- ✓ Cabling and power supply unit in a complete set
- ✓ Easy installation of the sets in tile adhesive

**Note!**

Use only with indoor applications!  
The set is designed for straight staircases.  
The appropriate stair profiles for the respective cover material has to be ordered separately!  
For variable light control, we recommend our radio control on page 66.

## Decorative frame sets (D)

Schlüter-LIPROTEC-D 90 are sets for creating illuminated decorative frames. With these complete sets, mirrors or design elements such as printed glass or decor panels can be elegantly framed with indirect LED lighting. The carrier profiles have already been mitred and four matching Schlüter-LIPROTEC-ES-LED strips with a colour temperature of 3300 K (warm white) or 4500 K (neutral white) are included in the set, as well as the power supply unit and all material for assembly and wiring.

WARM WHITE

#### Dimensions of decorative element (e.g. mirror):

115.3 cm x 90.3 cm (10 mm illuminated joint)

**Weight of decorative element:** max. 16 kg

Controlling Schlüter-LIPROTEC is no witchcraft, but instead as individual as you and your customers. We have the right solution for every level of sophistication: from simple single-channel switches to a combination of radio remote control and Bluetooth control per smartphone. If you want, you can also simply control your LIPROTEC accent lighting with an existing light switches. Anything but complicated!

Control Schlüter-LIPROTEC the way you want:

- ✓ On/off with light switch already available in the building
- ✓ On/off/dimming with our radio switches
- ✓ On/off/dimming per app and remote control
- ✓ On/off/dimming and colour control per app and remote control

## Controlling Schlüter®-LIPROTEC LED installations

Schlüter-LIPROTEC is a system for individual solutions. You also have full freedom of choice for controlling the LEDs. You can choose between various concepts depending on the desired light type and installation size. You can use innovative and economic Bluetooth control, radio control with a transmitter and receiver, or control larger installations centrally using master/slave technology. Orient yourself with our schematic diagrams and let us guide you to the suitable technology.

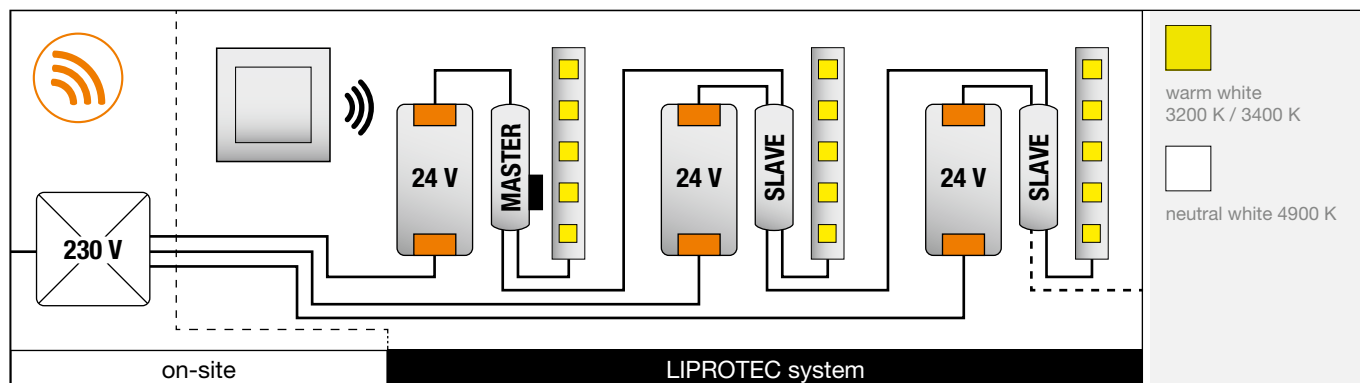

Bluetooth control (smartphone/tablet with free app) .....Page 64

Radio control (transmitter and receiver) .....Page 66

Radio control for objects (transmitter and master/slave receiver) .....Page 68

## Schlüter®-LIPROTEC Bluetooth control

Schlüter-LIPROTEC-EBR are Bluetooth receivers for installations with innovative illuminated profile technology. The Schlüter-LIPROTEC-EBR 1 / -EBR 4 receivers are controlled either with a remote control contained in the scope of supply or with mobile end devices such as smartphones and tablets. An attractive wall holder accommodates the remote control using a magnet fixing system. An app for control can be downloaded for free via Google Play (Android™) or the Apple App Store (iOS).

## Schlüter®-LIPROTEC-EBR 4

Schlüter-LIPROTEC-EBR 4 is a Bluetooth/radio receiver for controlling up to 12 m of LED strip from the LT ES 9 series using the included radio remote control or via suitable Bluetooth-capable smartphones or tablets. The receiver is operated via Bluetooth by means of the Schlüter LED Colour Control app, which is downloadable for free for both Android and iOS devices. Up to two end devices can be simultaneously coupled with the receiver.

In excess of 16 million colours and white tones with variable colour temperatures can be set with the RGB+W LED strips LT ES. A preselection of white and coloured hues is possible, these can be stored as favourites in the app. 42 different colour sequences are preprogrammed and can be played at variable speeds. The very compact dimensions of the Bluetooth receiver enable space-saving installation.

We recommend using an on-site light switch to optimise operating convenience.

### Schlüter®-LIPROTEC-EBR 4

bluetooth/radio receiver RGB+W, controllable

Art.-No.	€ / Unit	P (Units)
LT EBR 4	155.98	10

Contents:

- Bluetooth receiver 24 V
- Radio remote control with battery
- Wall holder for remote control
- 5 x connection terminals, 3-core

#### Technical data for Bluetooth receiver (for use with LT ES 9 RGB+W LED strips)

Max. range:	10 m
Input voltage:	24 V, DC
Max. total load in the LIPROTEC system:	180 W
Max. length of RGB+W LED strips LT ES 9 in the LIPROTEC system:	12 m
Degree of protection:	IP63
Ambient temperature:	-20 °C to +50 °C

## Schlüter®-LIPROTEC-EBR 1

Schlüter-LIPROTEC-EBR 1 is a Bluetooth/radio receiver for controlling up to 24 m of white LED strip from the LT ES 11 – LT ES 61 series using the included radio remote control or via suitable Bluetooth-capable smartphones or tablets. The receiver is operated via Bluetooth by means of the Schlüter LED Colour Control app, which is downloadable for free for both Android and iOS devices. The variously dimmed luminous intensities can be saved as favourites in the app software and controlled via a mobile end device and the included remote control.

Up to two end devices can be simultaneously coupled with the receiver. The very compact dimensions of the receiver enable space-saving installation.

We recommend using an on-site light switch to optimise operating convenience.

- Bluetooth receiver 24 V
- Radio remote control with battery
- Wall holder for remote control
- 2 x connection terminals, 3-core

#### Technical data for Bluetooth receiver (for use with LT ES 11 to LT ES 61 LED strips)

Max. range:	10 m
Input voltage:	24 V, DC
Max. total load in the LIPROTEC system:	180 W
Max. length of LED strips LT ES 11 to LT ES 61 in the LIPROTEC system:	24 m
Degree of protection:	IP63
Ambient temperature:	-20 °C to +50 °C

## Everything under control: Systematic LED control

We offer system components of the highest quality for light control to help you make full use of the options of the Schlüter illuminated profile technology. These range from reliable power supply units to intelligent receivers and elegant switches that transmit their commands wirelessly to the illumination components. As an additional benefit for you, wireless control technology significantly reduces the expenditure of installation and wiring.

### 1 Schlüter®-LIPROTEC-EKE – Power supply units

Power supply units convert the main voltage to the 24 V required by our LED strips. They are easy to install and available in different wattages from 30 to 200 W for LED strips up to 18 linear metres.

### 2 Schlüter®-LIPROTEC-ER – Receivers

Receivers transpose the wireless signals from the switch (transmitter) into commands for the LED strips.

- LT ER 1 (on, off, dim) for simultaneous control of white LED strips with fixed colour temperature.

### 3 Schlüter®-LIPROTEC-E – Switches (transmitters)

With the switches, the user can control the illuminated profile technology. The wireless control makes installation very easy. All switches (transmitters) are available in two different frame designs. You can choose between genuine glass, back-coated in brilliant white or brushed V4A stainless steel.

The switches (transmitters) are available in the following versions:

- Single channel (on, off, dim) for controlling white LED strips with fixed colour temperature together with receiver LT ER 1.
- Dual channel (on, off, dim) for simultaneous control of two LT ER 1 receivers with white LED strips and fixed colour temperature.

## Central control with master/slave technology

As a supplement to reliable radio control, you can now also control larger illuminated profile technology installations via master/slave technology. The range of components includes reliable power supply units, intelligent master/slave receivers and elegant switches that transmit commands wirelessly to the light installation. Only the connections between power supply units and receivers as well interconnection between receivers (master/slave and slave/slave) is implemented with cables. As a result, 24 V LED strips can be installed to a length of 570 m, and controlled via a single, central radio transmitter.

### The principle: master/slave

The master/slave system enables the simultaneous control of several interconnected receivers over long distances (maximum of 200 m). For this purpose, a master receiver is connected via a 2-core AWG 16 cable with up to 40 slave receivers. The master receiver is taugh-in together with the switch (transmitter), and slave receiver functionality follows the master receiver. This enables large installations with slave receivers far apart from each other to be centrally controlled with only one transmitter.

### Schlüter®-LIPROTEC-ERM

Schlüter-LIPROTEC-ERM is a master receiver for the central control of large Schlüter-LIPROTEC light installations in accordance with the master/slave principle. The receiver forwards commands received from the radio transmitter to up to 40 slave receivers via a 2-core AWG 16 cable.

#### Schlüter®-LIPROTEC-ERM

##### LED master receiver, 24 V

Art.-No.	€ / Unit	P (Units)
LT ERM 1	297.91	10

**1 Schlüter®-LIPROTEC-EKE – Power supply units**

The power supply units convert the mains voltage to 24 V, as required for the LED strips. The units are easy to install and available in various wattages from 30 to 200 W.

**2 Schlüter®-LIPROTEC-ERM – Master receivers**

The master receiver transposes the wireless signals from the transmitter into commands for the LED strips. It is the first component in a light system.

- LT ERM 1 (on-off-dimming) for controlling white LED strips with permanent colour temperature (LT ES 11 – LT ES 61 ).

**3 Schlüter®-LIPROTEC-ERS – Slave receivers**

The slave receivers convert signals received from the master into commands for the LED strips. They are components installed downstream from the master and are interconnected in sequence. Slave receivers can only be controlled by the appropriate master receiver.

- LT ERS 1/3 (on-off-dimming) for the simultaneous control of white LED strips (LT ES 11 – LT ES 61 ).

The control line between master and slaves is a 2 x 1.31 mm<sup>2</sup> low voltage cable (AWG16).

**4 Schlüter®-LIPROTEC-E – Switches (transmitters)**

With the switches, the user can control the illuminated profile technology. The wireless control makes installation very easy. All switches (transmitters) are available in two different frame designs. You can choose between genuine glass, back-coated in brilliant white or brushed V4A stainless steel. The switches (transmitters) are available in the following versions:

- Single channel (on, off, dim) for controlling white LED strips with fixed colour temperature together with LT ERM 1 master receiver.
- Dual channel (on, off, dim) for simultaneous control of two LT ERM 1 master receivers with white LED strips and fixed colour temperature.

**Technical data for the master/slave system**

(specifications with 24 V LED strips from the LT ES 11 – LT ES 61 range)

Receive frequency:	868.3 MHz
Power supply:	24 V, DC
Max. total load in the LIPROTEC system:	135 W
Degree of protection:	IP20
Ambient temperature:	-20 °C to +50 °C

**Max. possible length of LED strips in master/slave system**

LED strips LT ES 11 – LT ES 61:	570 m
---------------------------------	-------

**i**  
See page 67 for transmitters.

**Schlüter®-LIPROTEC-ERS**

Schlüter-LIPROTEC-ERS is a slave receiver for the central control of large Schlüter-LIPROTEC light installations in accordance with the master/slave principle. Up to 40 slave receivers can be controlled by a master receiver via a 2-core AWG 16 cable.

**Schlüter®-LIPROTEC-ERS****LED slave receiver, 24 V**

## Installation material

We also offer a complete range of accessories for the wiring installation of the Schlüter-LIPROTEC system. Schlüter-KERDI-BOARD installation modules with pre-cut cable ducts are an ideal practical solution. The two-part cable duct Schlüter-LIPROTEC-ZKK can be mounted in them by simply placing the cables inside from the front. There is no need to thread any wires through conduits. The closed cable duct can then be sealed with the Schlüter-KERDI-KEBA jointing tape and Schlüter-KERDI-COLL-L sealing adhesive.

### Schlüter®-LIPROTEC-ZK

Schlüter-LIPROTEC-ZK are colour-coded low voltage cables for connecting Schlüter-LIPROTEC LED strips to a suitable power supply unit and/or receiver.

## Schlüter®-KERDI-BOARD-NLT

Schlüter-KERDI-BOARD-NLT are prefabricated niche sets made of KERDI-BOARD with plug-and-play LIPROTEC-LED technology. They are used to create illuminated niches and supporting surfaces for wall areas of all kinds. These niches can be integrated into the Schlüter-KERDI waterproofing system as a bonded waterproofing assembly.

The niches are available in different dimensions and hues. The rectangular niches are available with illumination either on the long or the narrow side. The LED module can either be positioned at the front edge, in the center or at the rear wall that is to be tiled. The scope of supply includes all components required for the installation, as well as the cable connection, power supply and sealing collar. We recommend using an on-site light switch to optimise operating convenience. A Bluetooth control for RGB+W lighting has to be ordered separately and can be found on page 16. (Product data sheet 12.1)

NICHES	APPLICATION AREA	PROPERTIES	DIMENSIONS

					RGB+W

## Schlüter®-LIPROTEC-LLP

Schlüter-LIPROTEC-LLPE are LED modules consisting of a flexible, encapsulated LED strip with homogenous light dispersion and a U-shaped receptacle profile made of aluminium. With the LED modules, coloured RGB+W light strips with more than 16 million different hues and colour temperatures of 2500 K – 6500 K can be created. The receptacle profile with an installation height of 17mm makes flush installation possible. (Product data sheet 15.5)

## Schlüter®-LIPROTEC-LLPM

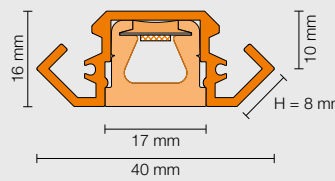

Schlüter-LIPROTEC-LLPM are plug-and-play LED modules consisting of a flexible, encapsulated LED strip with homogenous light dispersion and a receptacle profile made of aluminium or stainless steel with trapezoid perforated anchoring leg. The LED modules are available either with a fixed white-light colour temperature of 3000 K or 4900 K, or with a RGB+W colour range. The latter makes it possible to choose from more than 16 million hues and colour temperatures from 2500 K – 6500 K. The white LED module is available with an installation height of 11 mm, which means it can be installed flush with the tile thickness. *(Product data sheet 15.8)*

## Schlüter®-LIPROTEC-LLPE

Schlüter-LIPROTEC-LLPE are LED modules consisting of a flexible, encapsulated LED strips with homogenous light dispersion and a receptacle profile made of anodised aluminium. The LED module with RGB+W coloured light range makes it possible to choose from more than 16 million different hues and colour temperatures from 2500 K – 6500 K. With the LED module, accent lighting can be created at wall corners. It is suitable for use in internal and external corners in the shower, preferably with vertical alignment. *(Product data sheet 15.7)*

## Schlüter®-LIPROTEC-LL

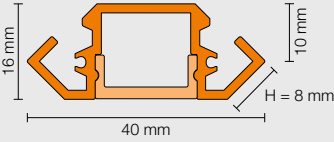

Schlüter-LIPROTEC-LL is a high-quality, anodised aluminium carrier profile for creating accent lighting in wall coverings and ceilings. The illumination is provided by Schlüter-LIPROTEC-ES LED strips laid into the U-shaped profile, in combination with the corresponding diffuser lens. Various direct or indirect light effects are created according to the positioning of the profile.

PROFILES / TYPE OF LIGHT	APPLICATION AREA	PROPERTIES	PROFILE DIMENSIONS		DIMENSIONS LED STRIPS
	ALUMINIUM		WIDTH / HEIGHT (mm)	LENGTH (m)	LENGTH (cm)
WARM WHITE/ NEUTRAL WHITE	 Vertical installation only  	 		2.5	50
					100
RGB+W					150
					200
					250
					400

Supply line: 3 m. The 400 cm LED strips are equipped with two supply lines each. The photometric data describes the LED strips only. The optical efficiency is influenced by the properties of the diffuser lens (*Product data sheet 15.5*).

## Schlüter®-LIPROTEC-LLE

Schlüter-LIPROTEC-LLE is a high-quality carrier profile made of anodised or white coated aluminium for mounting the Schlüter-LIPROTEC-ES LED strips. The profile is designed to create accent lighting in wall corners. It is suitable for use in internal and external corners in horizontal or vertical alignment. With the respective pre-fabricated parts, continuous installations around corners are also possible. The profile can either be simply attached to any suitable substrate with a clip system or is embedded in the tile adhesive. For lighting, the selected LIPROTEC-ES LED strip is adhered within the profile and covered with the corresponding diffuser lens.

PROFILES / TYPE OF LIGHT	APPLICATION AREA	PROPERTIES	PROFILE DIMENSIONS		DIMENSIONS LED STRIPS

## Schlüter®-LIPROTEC-WS

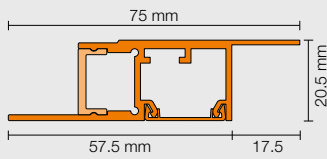

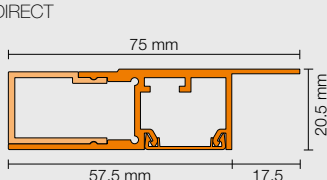

Schlüter-LIPROTEC-WS is a high-quality carrier profile of anodised aluminium for illuminating protruding wall panels with various Schlüter-LIPROTEC-ES LED strips integrated into the profile. Differing light effects are created in combination with two different diffuser lenses. The assembly can be used to create recessed direct or indirect lighting for on-wall structures. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

Supply line: 3 m. The 400 cm LED strips are equipped with two supply lines each. The photometric data describes the LED strips only. The optical efficiency is influenced by the properties of the diffuser lens (*Product data sheet 15.2*).

## Schlüter®-LIPROTEC-WSK

Schlüter-LIPROTEC-WSK is a high-quality, anodised aluminium carrier profile for illuminating protruding wall panels with various Schlüter-LIPROTEC-ES LED strips laid into the profile. Differing light effects are created in combination with two different diffuser lenses. Recessed, indirect or narrow illumination for wall protrusions are created in this way. An integrated cable duct with milling grooves for cable installation and a support bracket for Schlüter-KERDI-BOARD (19 mm) aid the installation process.

## Schlüter®-LIPROTEC-WSQ

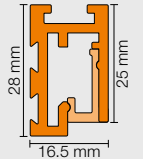

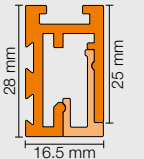

Schlüter-LIPROTEC-WSQ is a high-quality carrier profile of anodised aluminium for illuminating raised wall panels with various Schlüter-LIPROTEC-ES LED strips integrated into the profile. Differing light effects are created in combination with two different diffuser lenses. The assembly can be used to create recessed direct or indirect lighting for on-wall structures. LIPROTEC-WSQ features a formed cover finish with timelessly modern Schlüter-QUADEC design. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

## Schlüter®-LIPROTEC-PB

Schlüter-LIPROTEC-PB is a high-quality landing edge profile of anodised aluminium with a visible area of 25 mm. It is designed for mounting Schlüter-LIPROTEC-ES LED strips and can be used with Schlüter-TREP stair nosing profiles to create appealing lighting along the edges of platforms. Differing light effects are created in combination with two different diffuser lenses. Edges can either be illuminated indirectly or directly by adding a 3 mm light strip. Another application area of LIPROTEC-PB is the direct or indirect illumination of work surface front edges. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

## Schlüter®-DESIGNBASE-QD

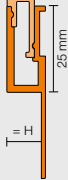

Schlüter-DESIGNBASE-QD is a high quality-profile of anodised aluminium for versatile applications. It is designed for mounting various Schlüter-LIPROTEC-ES LED strips as a skirting or border profile in wall areas. A 39 mm diffuser lens is then used between the approx. 10 mm wide visible areas of the profile to create direct illumination. Other decorative materials such as tiles or wooden elements can also be inserted in the open space. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

PROFILES / TYPE OF LIGHT	APPLICATION AREA	PROPERTIES	PROFILE DIMENSIONS		DIMENSIONS LED STRIPS

					200
					250
					400

Supply line: 3 m. The 400 cm LED strips are equipped with two supply lines each. The photometric data describes the LED strips only. The optical efficiency is influenced by the properties of the diffuser lens (*Product data sheet 16.1*).

## Schlüter®-LIPROTEC-VB

Schlüter-LIPROTEC-VB is a high-quality tile finishing profile for wall areas, with a visible area of 25 mm. It is designed for mounting Schlüter-LIPROTEC-ES LED strips and can be used to create varying light effects in combination with two different diffuser lenses. Indirect light can either radiate from the profile edge to the ceiling via adjoining materials or along the skirting. Additionally, a 3 mm light strip can create direct light. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

PROFILES / TYPE OF LIGHT	APPLICATION AREA	PROPERTIES	PROFILE DIMENSIONS		DIMENSIONS LED STRIPS

**Note:** LED strips can be shortened every 50 mm.

## Schlüter®-LIPROTEC-D

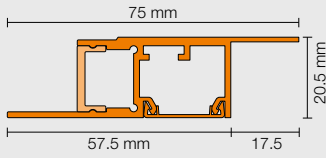

Schlüter-LIPROTEC-D is a decorative receptacle profile for wall areas of anodised aluminium with a visible area of 6 mm. It allows for the insertion of various decorative materials such as glass or mirrors to adjoin ceramic tile coverings. LIPROTEC-D can be used to mount Schlüter-LIPROTEC-ES LED strips for creating indirect light effects around a decorative element. The profile design allows for the easy replacement of the utilised diffuser lenses and bulbs, including after installation.

Supply line: 3 m. The 400 cm LED strips are equipped with two supply lines each. The photometric data describes the LED strips only. The optical efficiency is influenced by the properties of the diffuser lens (*Product data sheet 15.3*).

## Wall panel sets (WSK)

The wall panel sets with RGB+W light makes it easy to make a big impression. Simply select between the wide (128.5 cm) and narrow (70 cm) wall panels and order the practical profile set with it. Our RGB+W technology provides you with unlimited design freedom: More than 16 million hues turn your rooms into colour-flooded leisure zones. White hues from 2500 K – 6500 K let your wall panels radiate the same light as your existing ceiling light. If desired, it can be controlled with a Bluetooth receiver. The matching Schlüter-Systems app can be downloaded for free from Google Play (Android™) or the Apple App Store (iOS).

## Staircase sets (PB)

Schlüter-LIPROTEC-PB stair sets put light where it is needed: in the middle of the stair step. The PB 15 complete sets for 15 steps have 60 cm wide LED modules pre-mounted in the middle. With their diffuser lenses, they provide indirect illumination with a discreet line of light. The combinations of aluminium carrier profile and diffuser lens are 100/150 cm long and can be shortened individually as required. The LED modules have a 4500 K neutral white colour temperature and are cabled by means of a simple coupling system; a 500 cm connection cable and power supply are included in the set.

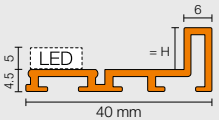

And if that isn't enough: the stair set can easily be expanded to 18 steps with only one supply line. To this end, use the Schlüter-LIPROTEC-PB 1 single-step sets.

PROFILES / TYPE OF LIGHT	APPLICATION AREA	PROPERTIES	PROFILE DIMENSIONS		DIMENSIONS LED STRIPS

The photometric data describes the LED strips only.

## Decorative frame sets (D)

Schlüter-LIPROTEC-D 90 are sets for creating illuminated decorative frames. With these complete sets, mirrors or design elements such as printed glass or decor panels can be elegantly framed with indirect LED lighting. The carrier profiles have already been mitred and four matching Schlüter-LIPROTEC-ES-LED strips with a colour temperature of 3300 K (warm white) or 4500 K (neutral white) are included in the set, as well as the power supply unit and all material for assembly and wiring.
